

YOU'RE THE CHOREOGRAPHER

While the Jit is fun to watch, it's even more fun to *do*! Let's take the steps you've learned to **make your own routine**.

Classic steps (from the Google Slides) :

- The Walk
- The Jazzit
- The Strike
- Kick Up - Side to Side
- Drops

Contemporary steps (demonstrated by Stringz in the videos):

- Kick Wiggle
- Heel Wiggle
- Kick Wiggle Step Ball Change (switch sides, too!)
- Air Wiggle (with Kicks or Knees)
- Kick Wiggle Back (and different Back variations)
- Shuffles (Kick Wiggle, Knee Wiggle)
- Crossovers

Reference the slides and videos for a refresher, too!

Which steps do you really like?

Do some steps naturally transition into others?

How can you make transitions of your own?

On the next page, write out the steps you want to do. **Start simple**. Then add some of the **variations** (e.g. switch your feet, use your arms).

Next, pick a song with a **steady beat** and Jit to it!

Can certain steps line up with the music? How can Jit highlight the music and lyrics (*and the other way around, too*)?

YOU'RE THE CHOREOGRAPHER

Write out the steps for your routine below and then try it out! Rearrange the order of your steps, too. **Practice** and **experimentation** will help make your routine *better and better!*

Have fun! Try your routine with different songs, too!
